 If no, may we use only your name and comments for testimonials? Yes / No / N/A

**Comments / Feedback** The day the job was to start it was raining but the installers brought the windows + materials + covered them at the back of house - they came back mid-afternoon to see if the rain had stopped which it had + were able to install 2 of the 4 windows - all debris was tidied up including the inside! The next day the crew had an early start + were able to install the remaining 2 windows, did all the interior  
 (use back of page if more room is required).

Finishing + all the exterior cladding was very neat + tidy - nice caulking work! The house is 45 years old and I thought chunks of the old stipple stucco may fall off but it was perfectly intact. There was some wood rot which was replaced with new wood + some additional insulation added around the wood frames on the inside which had not been there previously being the old engineered windows. The crew completed the entire job while I was away at work - they were very trustworthy and John the crew foreman communicated with regular text updates which was very appreciated. A+ workmanship!
